

## Security Policy

We shall identify security risks to our employees, physical and information assets, including those of our customers, and mitigate them by the most cost-effective means.

We shall continually improve the effectiveness of our security management system to assure ourselves and our customers that all our assets and those entrusted to us are safeguarded.

We shall work with our stakeholders to embrace the SGSecure movement and address terror threats.

We shall promote and build a culture of security consciousness and conscientiousness among all employees.

We take security seriously.

A handwritten signature in black ink, appearing to read "su", is positioned above the name of the CEO.
